

Betashares Australian Investment Grade Corporate Bond Fund (NZD Hedged)

30 April 2024

Objective

The Fund aims to provide an investment return that tracks the performance of the Solactive Australian Investment Grade Corporate Bond Select TR NZD Hedged Index, before taking into account fees and expenses.

Benefits

Attractive income paid monthly

The Fund seeks to provide investors with attractive monthly income that is expected to exceed NZ cash rates and yields on NZ composite bond exposures.

Diversification and defence

Fixed income investments can act as a defence when equities are not performing well. Investment grade corporate bond returns have tended to show a low correlation with shares, and therefore have the potential to mitigate the effects of sharemarket drawdowns.

Invest in bonds intelligently

The Fund selects bonds based upon expected returns rather than debt outstanding, seeking to avoid shortcomings of traditional debt-weighted indices and provide relatively higher returns.

Currency-hedged

The Fund is currency-hedged to the New Zealand dollar, substantially reducing the effects of currency fluctuations on returns.

Average credit rating ⁷	BBB+

1 Average coupon yield of the bonds in the portfolio (weighted by market value). Subject to change over time as interest rates and constituents change. Does not account for FX hedging impact. Yield is variable.

2 The annualised total expected return of a portfolio if underlying bonds are held to maturity and do not default, and the coupons are reinvested. Does not account for FX hedging impact. Yield is variable.

3 The annualised total expected return of a portfolio if underlying bonds are held to maturity or are called, does not default, and the coupons are reinvested. Yield to Worst is the lower of either Yield to Maturity or Yield to Call. Assumes no change in interest rates. Subject to change over time. Does not account for FX hedging impact. Yield is variable.

4 The cost / carry from hedging the fund's FX exposures. This is an estimated number calculated by annualising the current 1-month forward points of the relevant currency pairs.

5 Average length of time until the current bonds in the portfolio mature (weighted by market value).

6 A measure of the sensitivity of the portfolio's value to a change in interest rates, e.g. modified duration of 6 years implies a 1% rise in the reference interest rate will reduce portfolio value by 6.00%.

7 Average credit rating for the bonds in the portfolio. Credit ratings are opinions only and are not to be used as a basis for assessing investment merit. Ratings are subject to change.
